

Go Mobile Apps

Mobile-First Asset & Maintenance Management

Go is AssetWorks Facilities' suite of secure, role-based mobile apps purpose-built for higher education facilities teams. Fully integrated with AiM, our core IWMS offering, Go puts real-time asset, work, and inspection data in technicians' hands—online or offline—helping teams complete work faster, improve data accuracy, and keep campus operations moving.

With Go, Unlock:

MOBILE PRODUCTIVITY

Empower field teams to manage work orders, assets, inspections, and updates from anywhere—keeping work moving without returning to the office.

OPERATIONAL EFFICIENCY

Streamline work execution and reduce administrative overhead through intuitive, mobile-first workflows across multiple apps.

REAL-TIME VISIBILITY & FAST ADOPTION

Track asset status and work progress as it happens, with an easy-to-use interface that ensures fast adoption across your team.

Ideal For:

- Field technicians and maintenance staff working across campus buildings who need instant access to work orders, assets, and inspections
- Frontline workers who want to complete daily tasks more efficiently without returning to office
- Teams transitioning from paper-based workflows to mobile-enabled operations
- Organizations empowering their facilities staff with tools that work wherever they work

Core Capabilities Across the Suite:

- **Work Order Execution:** View assigned work orders and scheduled preventive maintenance, log labor hours, update status, and complete tasks—all from your mobile device in the field.
- **Asset Management & Verification:** Create, update, and verify asset records on-site. Access comprehensive asset information including maintenance history, specifications, and documentation while conducting physical inventories.
- **Inventory Control:** Check real-time stock levels, issue parts to work orders, perform cycle counts, and process inventory transactions directly from the field.
- **Procurement Processing:** Submit purchase requests and manage receiving operations on-site, streamlining the procurement cycle from requisition through delivery.
- **Project Tracking:** Monitor capital projects with mobile access to timelines, documentation, and progress updates—keeping all stakeholders informed from anywhere on campus.

The Go Suite of Apps:

Go is not just one app—it's a complete mobile ecosystem designed to support every aspect of facilities operations:

GO: WORK MANAGEMENT

Mobile work order and preventive maintenance management app

GO: ASSET MANAGEMENT

Mobile asset management, inventory, and inspection app

GO: INVENTORY

Real-time mobile inventory and parts tracking app

GO: PURCHASING

Mobile purchase request and procurement initiation app

GO: RECEIVING

Mobile delivery processing and receiving management app

GO: CAPITAL PLANNING & PROJECT MANAGEMENT

Mobile capital project tracking and field updates app
